cama PHHC

Your care products packaged with our care.

Don't let your packaging machine's capabilities define what you can do. We have a machine portfolio that covers all possible packaging formats, so you don't need to compromise.

No matter what Personal Home Healthcare (PHHC) product you are trying to package, we will have a concept, style, speed, throughput and size that perfectly matches your product, your application and your factory real-estate. Our work and experience from across multiple industries is fed into every machine we create, so you're not just getting the best from PHHC, you're getting experience and domain expertise from other industries too. So much best practice!

Full industry 4.0 capabilities with smart automation, electronic axis control and fully integrated in-house developed robots for the core of lines, standalone and monobloc modular architectures that adapt to what you need now and why you will need in the future.

Premium technology, cabinet-free frameworks and hygienic design principals are coupled to an easy-to-follow visual machine management system, backed by extensive immersive technology and remote access capabilities. We are ready for your PHHC packaging challenges.

Let your imagination define your packaging, not your machines.

PHHC covers a multitude of styles concepts and packaging formats, so you need packaging technology that has the flexibility to adapt to what you need. Don't let your machines define what you can achieve. Get them to do what you want them to do. Containers, jars, bottles, pots, flowpacks, tablets, bars... on edge, flat, vertical... cases, cartons, boxes, trays - the combination are limitless. Which is why you need Cama's capabilities!

We can help you design eye-catching packaging concepts, and then design, build and deliver the packaging technology that will create these concepts... accurately, repeatedly and at speed.

Then, when the market changes, so can you, with quick changeovers helping you adapt and get your next new product to market even quicker.
