 Cama Bakery

Multiple solutions for countless varieties.

The bakery industry demands the same as others: speed, precision & repeatability, but we also have to look for delicacy, positive handling and maximum agility.

We take everything positive from every machine we manufacture for every industry we serve and design it into our solutions, so you know you are getting best practice and class-leading capabilities, not just from your industry but others too.

We won't force you to adopt our technology, we will adapt our technology to suit you. And with our comprehensive range of packaging styles and formats, you have maximum flexibility to choose a solution that precisely matches your application.

Electronic control and tightly integrated in-house developed robots are housed in modular and monobloc machines that cater for your precise requirements... and can grow as you grow.

Premium technology, cabinet-free frameworks and hygienic design principals are coupled to an easy-to-follow visual machine management system, backed by extensive immersive technology and remote access capabilities. We are ready for your bakery packaging challenges.

Designed with your needs in mind.

The bakery industry is so diversified in terms of product styles, formats, sizes and shapes that you need a packaging partner that can handle massive variety. You also need to keep pace with market demands and seasonal fluctuations. Can your packaging partner help you do that? Cama can! Don't let your packaging technology restrict your imagination and innovation. If you can design it, we can package it! Bags, packets, flow wraps, trays, cases, cartons, containers... you name, we can package it using side load, top load and robots, whatever best suits your needs.

With multiple successes in multiple packaging formats, products and markets, Cama Group can help you design eye-catching packaging concepts, and then deliver the means to fill them, accurately, repeatedly and at speed. And you there's no need to stand still. When your products change, the machine changes with you!

1. Bags into Tray/Lid case (Standing).
2. Bags into Tray/Lid case (Flat).
3. Bags into 3-flap box (Flat) – Top Load.
4. Bags into Wrap Around case (Flat).
