 **Cama Confectionery**

A sweet solution to your packaging challenges.

Our comprehensive machine portfolio covers all possible packaging formats so you don't need to compromise. We will have a concept, style, speed, throughput and size that perfectly matches your product and your application.

These solutions have been developed over decades to meet the precise needs of multiple industries. We then take these experiences and domain expertise and put them into every machine we make!

Full industry 4.0 capabilities with smart automation, electronic axis control and fully integrated in-house developed robots for the core of lines, standalone and monobloc modular architectures that adapt to what you need now and why you will need in the future.

Premium technology, cabinet-free frameworks and hygienic design principals are coupled to an easy-to-follow visual machine management system, backed by extensive immersive technology and remote access capabilities. We are ready for your packaging challenges.

Massive variety with the greatest capabilities.

The confectionery industry uses a huge range of packaging styles, arrays and formats, so you need packaging technology that doesn't stand still. You need a partner that can help you not only keep up with market demands, but also take the lead.

Containers, flowpack, tablets, bars... on edge, flat, vertical... cases, cartons, boxes, trays – the combination are limitless and so are our capabilities!

We can help you design eye-catching packaging concepts, and then design, build and deliver the technology that will create these concepts... accurately, repeatedly and at speed.

Then, when the market changes, quick changeovers help you adapt and get to market quicker.
